Subject: Re: Statement on TAGA Monitoring

It should be part per BILLION by volume.

Low level benzene was observed at many locations at levels less than 1 part per million by volume (ppbv)

Need to give External Affairs a statement about TAGA monitoring last night.
Below is my initial cut. Please review and send me any corrections/additions
ASAP. Thanks

"EPA conducted extensive air monitoring on 9/5/17 in the Manchester community. Low level benzene was observed at many locations at levels less than 1 part per million by volume (ppbv). A narrowly defined plume with a maximum benzene concentration at 19 ppbv was observed around Avenue L and 97 Street. Toluene and xylene were also observed at relatively low levels except in a couple of small plumes. Both compounds were detected at less than 20 ppbv. "
